Caterham G7 Race Cars For Sale

Originally manufactured to compete in a race series at the Bahrain International Circuit, Beachman Racing is now offering the complete 9-vehicle fleet of these purpose-built pre-owned turn-key race cars for sale, available mid-September 2015.

To perform in the harsh environment of racing in 110F degree temperatures, these wide (SV) chassis race cars have all of the necessary race components for durability and performance, including full motorsport roll-cages, dry-sump oiling, uprated oil and water cooling systems, full onboard fire suppression, and a limited slip differential. The engine is based on the larger-displacement Duratec 2.3-liter, configured for a very durable 200HP. A truly unique and capable configuration, in a factory-built race-car.

Although used in the driving school at BIC, the cars have been professionally maintained, and will be thoroughly refreshed before customer delivery by Beachman Racing, an authorized Caterham Cars agent. An unbelievable value in a track-oriented Caterham Seven!

Base Price: \$35,000

Specifications

CATERHAM CUP NORTHWEST - 2016

Overview

Beachman Racing is proud to introduce the inaugural “Caterham Cup - Northwest”, a single-marque race series featuring the reliable, fast, and proven Caterham Seven. Modeled after the Caterham Academy program in the UK, the Caterham Cup is designed to be an approachable introduction to racing, utilizing reliably fast and communicative Caterham Seven race cars within a restrictive rule-set that emphasizes driver development and performance, not vehicle preparation. The Caterham Cup will utilize a regulation tire, with additional rules to limit the participants’ tire budget.

In its first year, the series will visit several racetracks in the Pacific Northwest across five race weekends. With multiple races each weekend, the Caterham Cup will comprise a 15-race series. With an emphasis on education, camaraderie, and fun, as much as competition, Beachman Racing will fully support and administer the Caterham Cup.

For the 2016 Caterham Cup, vehicle eligibility centers around the Caterham G7 factory race car. A fully-supported, turn-key package for the 2016 Caterham Cup Northwest is available through Beachman Racing.

Caterham Cup Northwest - 2016 package (\$52,500) includes:

- Purchase of a 2005 Caterham Seven “G7” race car - fully prepped and ready to race
- Technical support at each race
- Full-time storage and transport of the vehicle to each race weekend in the Caterham Cup (2016)
- Pre-race “spanner check” prior to each event
- Participation in a 1-day driver school, check-out day, and entry into the 5-race weekend Caterham Cup Northwest race series
- Technical “chalk talk” sessions at race weekends, covering all aspects of road-racing - racing line, vehicle dynamics, and race-craft
